BabyPlus: Prenatal Education System

Mother's Day is right around the corner, and for those moms-to-be, I have the perfect gift for you! This year's hottest product is BabyPlus, the only US patented prenatal education system. Last year, Hollywood moms Nicole Richie, Gwen Stefani and Christina Aguilera all discovered the benefits of prenatal learning with BabyPlus. Now, new moms-to-be Trista Sutter and new moms, Alyson Hannigan and Victoria Recano (host of the 'Insider' and 'Entertainment Tonight') are not the only ones recognizing the importance of their baby's development in the womb. Check out Trista's and Alyson's personal letters of praise below.

This Hollywood pregnancy must-have encourages strong cognitive development. It's the only patented, prenatal curriculum that utilizes simple audio rhythms similar to the maternal heartbeat – the only true language of the prenatal environment. As a child hears the sounds of BabyPlus, he or she learns to distinguish between those sounds and the sound of the mother's heartbeat. Similar to prenatal vitamins which help children develop physically, the BabyPlus curriculum helps children develop cognitively.

Benefits of BabyPlus:

- * Parents report BabyPlus babies at birth and infancy are:
- * More relaxed and alert at birth
- * More interactive and responsive
- * Nurse more readily
- * Display an increased ability to self-soothe

And later in life demonstrate:

- * Earlier developmental milestones
- * Longer attention spans
- * Improved school readiness
- * Greater creativity and independence
- * Enhanced intellectual abilities
